A Series – slow speed granulators
Minimizes dust. Reduces noise.

General Description
The A series slow speed granulators feature a staggered rotor directly-driven by a geared motor. The low rotor speed reduces the noise level of the machine and creates less dust while grinding. The special design knives of the A series can be sharpened easily and do not need adjustment afterwards. The material is fed via a sound absorbing feed hopper that can be tailored to fit various applications and feeding ways. Depending on the requirements the machines can be fitted with a wide variety of hoppers, they are mounted on either low or high level base frames with matching suction bins or bag filling adapters. Quick snap fasteners and hand screws make access to the machine for cleaning and maintenance fast and easy.

Technical Machine Advantages
Direct driven staggered rotor
Special knife design makes adjustment unnecessary
Easy access for maintenance and cleaning
Slow rotor speed creates less noise and dust
Easily customizable to suit different applications
